

Step 1

Download nodeJS using below link.

For 64 bit Ubuntu OS

<https://nodejs.org/download/release/v8.9.4/node-v8.9.4-linux-x64.tar.gz>

For 32 bit Ubuntu OS

<https://nodejs.org/download/release/v8.9.4/node-v8.9.4-linux-x86.tar.gz>

Step 2

Download StickerPrinter.rar folder and keep this in /home folder (from Email (it.infra))

Step 3

Open terminal (ctrl+alt+T) and type following command

```
sudo apt-get install unrar
```

Step 4

Goto /home folder and extract StickerPrinting.rar

Step 5

In terminal type following command

```
cd /usr/local
```

```
sudo tar --strip-component 1 -xvf /home/$USER/node-v8.9.4-linux-x64.tar.gz (for 64 bit Ubuntu os) OR
```

```
sudo tar --strip-component 1 -xvf /home/$USER/node-v8.9.4-linux-x86.tar.gz (for 32 bit Ubuntu os)
```

```
cd ~/StickerPrinter
```

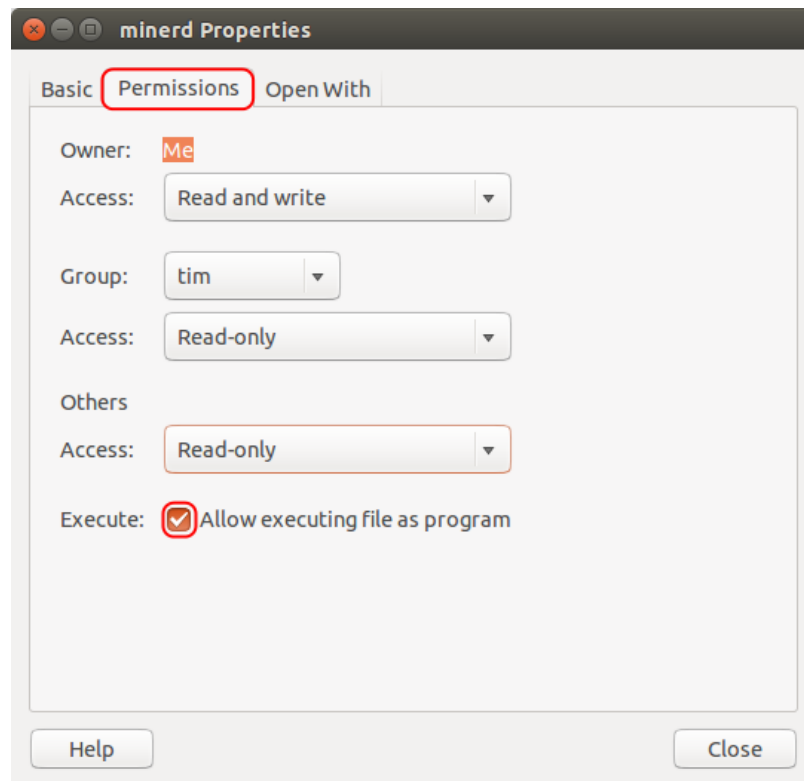

```
npm install Printer zuzel-printer node-printer
```

Step 6

Copy Desktop.sh file from StickerPrinter folder and paste on Desktopfolder

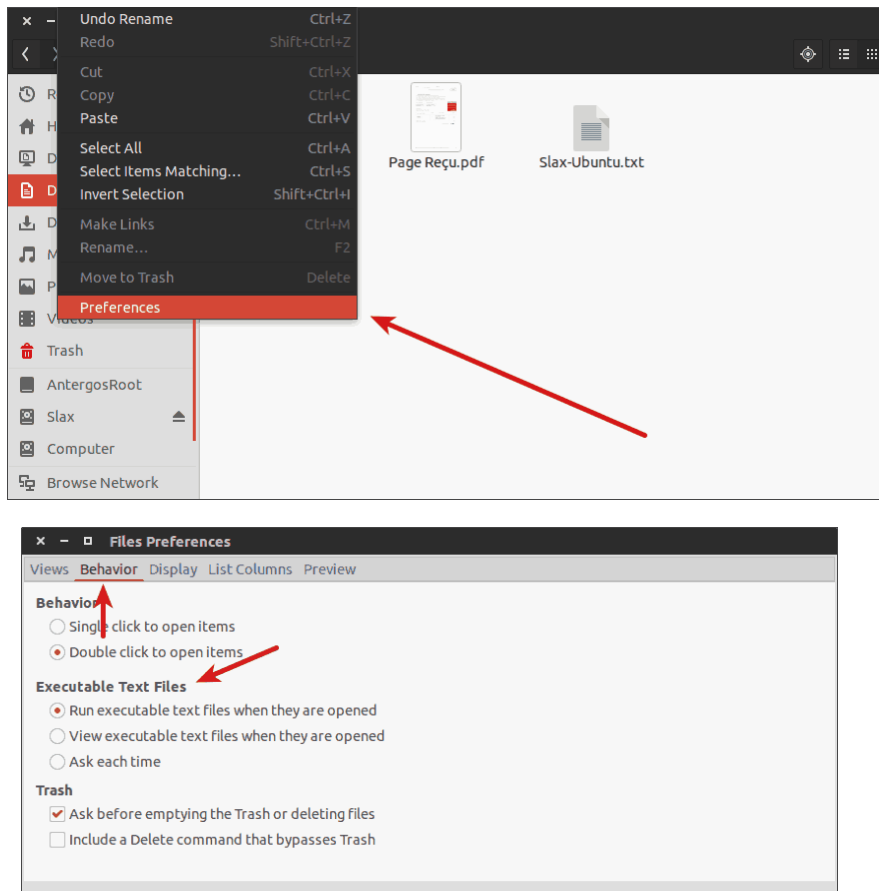

Right click on Desktop.sh file and select Properties, goto permission tab and simply check mark the check box for **"All Executing file as Program"** and click on closeon button.

Eg.

Step 7

Now goto Files menu -> Preferences , go to Behavior tab and you'll see the option of “ **Run Executables Text Files when they are opened**” as shown below.

Step 8

Now run Desktop.sh file simply by double clicking on it

Step 9
